# Production & Technology at Adell

### Raw Materials

High quality raw material is an unquestionable ingredient for excellent finished products.

#### For casting:

UBA listed CC 757 S, CC 770 S DZR

#### For Hot Forging:

UBA listed CW 617 N, CW 511 Low Lead

#### For turning and machining:

UBA listed CW 614 N, CW 509 L, CW 510L, CW 511L, various aluminum and steel materials

### Mould, Fixture and Cutting Tool Production

Mould developing is processed using the most precision CNC workbenches. Core, casting and hot working moulds, designed using the 3D Unigraphics, Solid Works CAD-CAM programs in computer environment, are made by cutting the steel blocks in microns with high precision.

### Low Pressure & Gravity Die Casting

Drafts are produced in different ways: low pressure die casting, gravity die casting. Sand cores, obtained by mixing the green sand with resin, silica sand and appropriate catalyst and chemicals in sand preparation machines, are formed into cores in the automatic core making machines.

### Brass Hot Forging

(Up to 400 tons)

With temperature-controlled induction furnaces, billets are homogeneously heated and the forged parts are guaranteed to have sustained quality throughout stabilized forging process. We can offer both forged and machined parts as well as only forged parts by customer design and drawing.

### Mechanic Operations

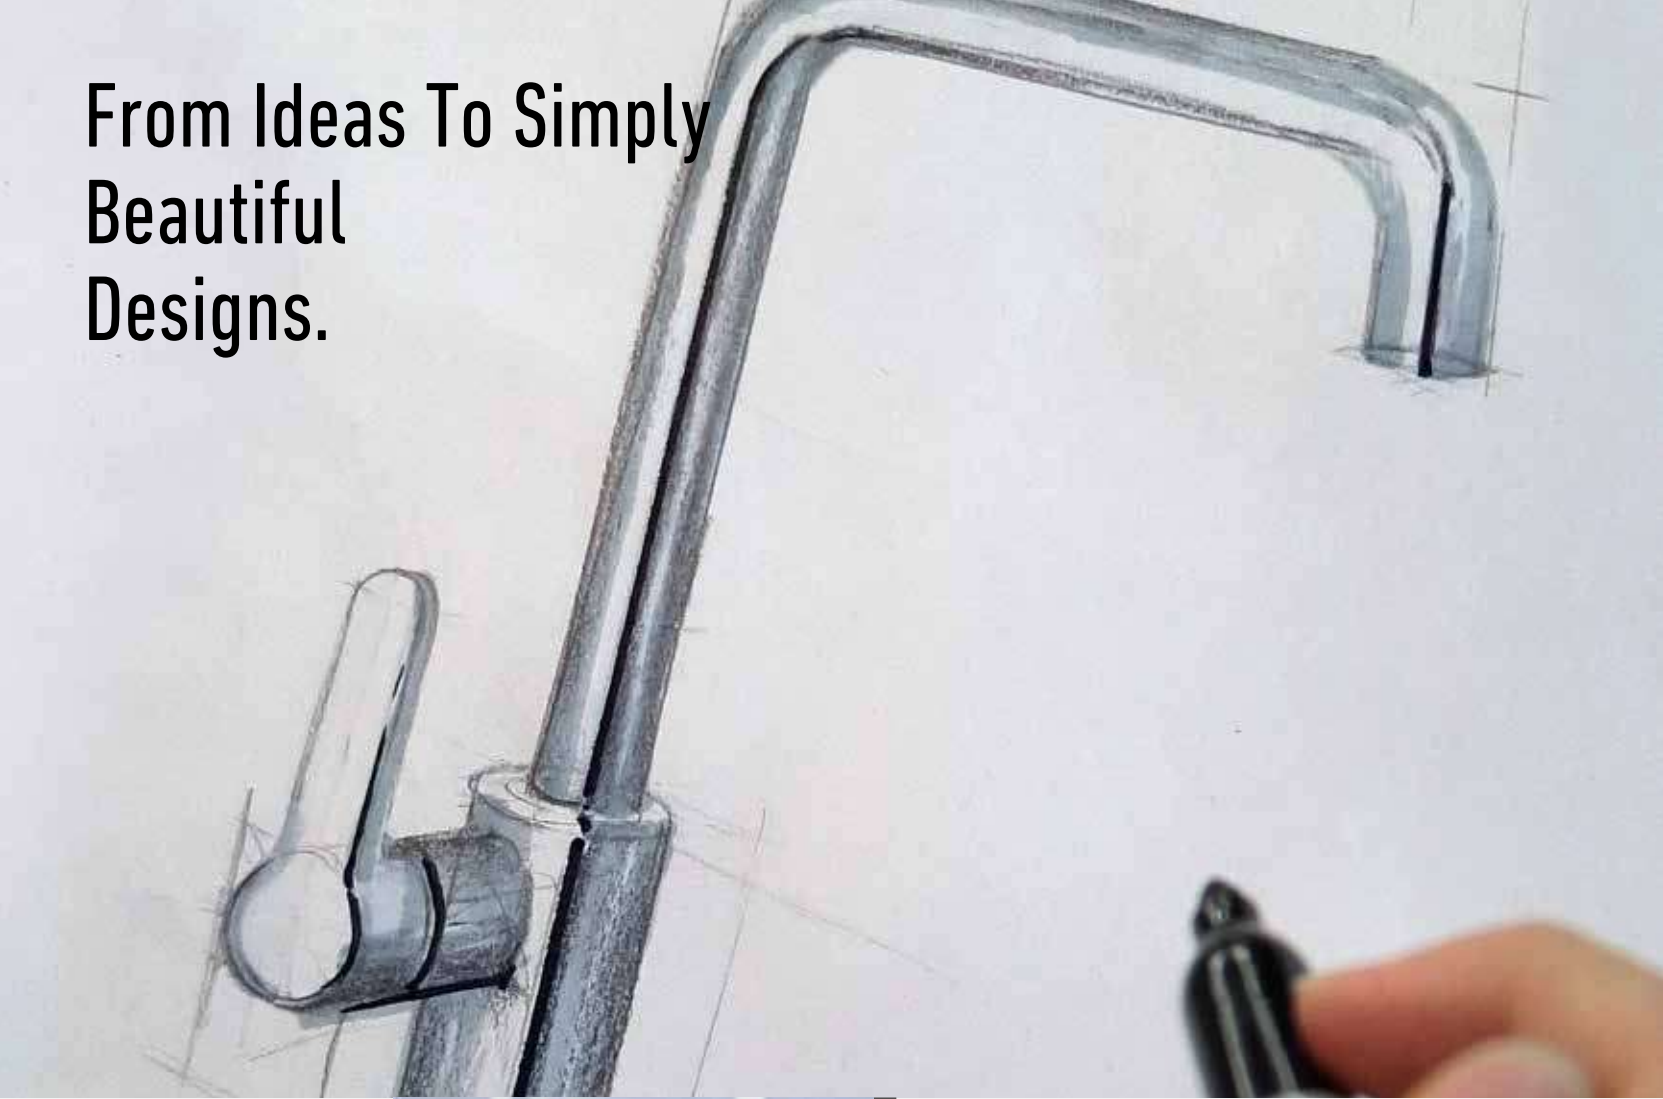

Drafts, whose runners are cut and whose burrs are taken off, are processed on CNC controlled benches, in the automatic transfer machines and 3, 4 and 5 axes horizontal / vertical CNC machining centers which carry out all operations named as mechanic operations such as turning, drilling and cutting.

### CNC Turning up to Ø65

The production of lathe-turned parts according to customer-specific sketches and precisely defined client quality requirements are daily challenges for our highly qualified precision engineering team.

# From Ideas To Simply Beautiful Designs.

## Engineering, Design And Innovation

Innovation and design are our most important values. Adell has unique aesthetical and stylish designs which protect the water and environment. We believe a good design will catch everyone. Our products are designed by our design experts according to customer demands and expectations, considering the national and international standards and our design criteria. Functionality, energy saving, aesthetics, ergonomics, mountability and maintainability, size compatibility, safety, production life span, testability, modularity, packaging and shipping, impact on environmental pollution, waste utilization, production techniques and cost issues are taken into consideration at the design phase.

## Adell Design Team

There is an idea behind every successful product. Everything is a dream that comes true. We work for original designs that speak the same language as the venue. The designs are carefully investigated and planned with careful details. The designs that increase the energies to the skies and take care of every drop of water.

# Steps Of Adell's Quality Process:

## QA - Quality Management

We believe quality is the best business plan. Therefore we test 100% of finished products, ensuring that they are able to perfectly perform all their functions. All organizations of our company carry out activities based on a consistent quality assurance system, from the product planning conceptions stage through development, design, manufacturing of prototypes, evaluation, mass production, delivering and after sales-delivering activity. The Quality Management team within Adell is a key function consisting of people from many disciplines.

## Assembling, Testing, Packaging

Product quality is developed with the perfect combination of fine components, details and precision workmanship. Each part is picked and scaled carefully with this approach. The product is mounted by assembling the product body with the parts such as cartridge, lever, aerator and screw. The assembled products are subject to 100% leak-tightness, Functionality and resistance to pressure tests in high precision testing devices.

## Achieving Excellence with CMM Inspection

At Adell, we ensure reliable quality assurance through meticulous inspection using our advanced Coordinate Measuring Machines (CMM). We attach utmost importance to the quality of our products. Therefore, we carry out precise inspections with state-of-the-art Coordinate Measuring Machines (CMM) and provide our customers with reliable and high-performance product. CMM machines use coordinate technology to measure the dimensions of the part. It can measure height, width, angle, depth and profile on the X, Y and Z axes. They can digitally measure and analyze parts, while offering a wide range of services such as dimensional analysis, CAD comparison, tool certification, and reverse engineering to uphold rigorous quality standards. Aberlink Xtreme 500 CMM machine and Faro CMM measuring arm allows us to check measurements against the engineering data and provide detailed dimensional reports.

## Global Sales Network & After Market Care

We know by heart: we stand for the water experience that people would love. Every product bearing Adell's signature is manufactured under superior technology standards and has a guarantee of perfection in material and manufacturing workmanship.

## Laboratory-Testing Center

Laboratory R&D activities are the studies which will carry us into future. The basic approach of our R&D unit is to spread on effort to ease the life and make life standards safer and more comfortable for people. Adell's laboratory center has the modern laboratory systems required by the related standards.

Testing for performance, durability and dimensional accuracy can be taken by trained personnel. We have the ability to run tests for EN 248 electroplating specifications, flow rate, high and low pressure, kitchen spout life cycle, diverter and hose life.

up to **10 YEARS** WARRANTY

## Products Guarantee Periods

10 years warranty for chrome plated single lever faucets.

2 years warranty for painted faucets, electronic faucets, taps and shower systems.

# PERFECT COMBINATION OF DIFFERENT MATERIALS FOR SUSTAINABLE QUALITY.

From which parts does a faucet consist? Excellent details, durable components, compatible hardware result in Adell quality. High standard, long life combined Adell faucets superior performance and long term performance thanks to the compatibility of all components and spare parts and durability. Carefully engineered, all parts complying with the standards.

## ERGONOMIC Handles

Adell handles are produced of high quality zinc material. It provides ease of use with ergonomic forms that grip the hand.

## %100 BRASS or Stainless Steel Faucet Spouts

From quality raw material produced long-lasting chic of the sink. Ergonomic and easy to use in forms and in different sizes for your to use the water comfortably.

## PLUMBER FRIENDLY Fixing deck-mounted parts

Adell faucet connections made from stainless and brass raw material. It provides to easy installation, easy replacement and easy maintenance.

Depending on product groups and designs, specifications may vary from spare parts.

### **EASY-OPERATED Bath Faucet diverters**

Automatic and compact Neoperl diverters are used. Long life and performance guarantee. When pulled up and locked to the right, it locks, when the battery is switched off, the pressure automatically switches to the crown position. Due to the locking system of the shower control unit in the bath and shower baths, the water flow from the handgrip is not affected by pressure fluctuations.

### **%100 BRASS MADE-IN-HOUSE**

#### **Wall connection parts**

Wall-connection eccentrics and raccors are produced from the first quality brass raw material. The wall connection elbows are 10-15 mm longer than the market products, so the threads do not need to be extended.

### **WATER SAVING Aerators**

Aerators are critical parts that determine the overall performance of a faucets. In the aerators, the water flow is enriched with plenty of air. This ensures that the water is like a soft, non-splashing flow and full shower drops. These aerators allow you to save up to 50% from water gives with a softer flow with its ability to mix water with air.

### **%100 BRASS Body**

It is produced from high grade brass raw material by technological casting system. The wall thicknesses are designed to meet performance criteria for water passages.

### **GUARANTEED FOR MORE THAN 1.000.000 CYCLES**

#### **Ceramic catridges**

Cartridges are the heart and most important working parts of Faucets. Adell products are made of long-lasting and quality cartridges with world quality ceramic discs. It has also 35 mm, 40 mm, with legs and without legs. We also use special cartridges in some series. Full tightness, heat resistance, abrasion resistant, but all are long lasting.

### **Certified Flexible hoses**

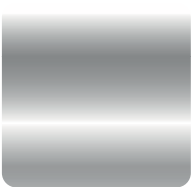

Basin and kitchen faucets come along with %100 tested leak-proof stainless steel or PE braided PEX flexible hoses. They are healthy and strong.

# Adell Kelvin

## Maximum Flexibility

### Functional Design

#### MagnetClick

At the end of Use, Adell MagnetClick™ magnetic system makes it easy to pull back the hood and pin it down.

#### EasyFix

Thanks to special water connection, it is very easy to assemble the Faucet in narrow spaces.

#### Soft Flow Function

As standard the water comes in the soft form mixed with air thanks to water saving aerator.

#### Jet Flow Function

With the pull of the button located at the bottom of the spout, the water flow turns into strong jet form to easily clean tough remains on dishes.

### EasyFix

Thanks to special water connection, it is very easy to assemble the Faucet in narrow spaces.

### Swivel Connection

Thanks to the hinged hand shower, it provides ease of use. You can easily reach all the points of your sink. You can use flex hose for many years without breaking.

### Soft Flow Function

As standard the water comes in the soft form mixed with air thanks to water saving aerator.

### Angle of Handle

Thanks to special design of body machining the handle opens almost vertically to avoid hits to the surface behind the kitchen worktable.

# Adell Tap Cleaner

**TAP CLEANER SPRAY FOR METAL PARTS**  
In the bathroom you want everything to shine, but the common sanitary cleaners often affect taps and fittings. Indeed, the taps are thoroughly clean afterwards, but there is always a risk of having damaged the gasket and components (e.g. valves and cartridges). Often aggressive cleaners are the reason for complaints. Therefore we recommend our Tap-Cleaner for the correct cleaning and care. Limescale and deposits will be removed gently without harming the surrounding ceramic and enamel surfaces. Thus preserving the value of the sanitary objects for a long time.

Code Number	18330005
Description	Tap-Cleaner
Application	For daily cleaning and care of taps and whirl pool jets
Surfaces	Chrome, stainless steel, brass, gold glossy/ matchromed, satined and gold plated surfaces
Customer's Benefit	For brilliant metal surfaces Protects valves and internal components Dirt-repellent through beading effect, antistatic effect Enamel- and eco-friendly, bio-degradable TÜV certified quality
How To Use	Spray cleaner onto the tap, allow to work briefly and then rinse with warm water and rub dry
Advice	Do not use on limestone surfaces (marble).
Storage	At +5° to 30°C, minimum durability 10 years
Contents	Spray bottle 750 ml

**ALL CHROME THAT SHINES!**  
Commercial detergents for fittings contain potent acids to effectively remove limescale. In doing so the fittings get cleaned, yet, there is a risk of also affecting the surrounding enamel surfaces of the bathtub or the shower tray in an unfavourable way. Cramer Chrome-Polish removes heavy stains and traces of oxidation leaving shiny fittings. With its enamel-friendly formulation it is also non-hazardous to the surrounding surfaces in the bathroom and leaves them sparkling as well.

Code Number	18330004
Description	Chrome-Polish
Application	Chrome polish for heavily stained and corroded surfaces
Surfaces	Glossy and matt chrome surfaces
Customer's Benefit	Thoroughly but gently cleans the surface, Acid-free and enamel-friendly formulation, Concentrated cleaning compound, Gentle on the skin, pleasant scent
How To Use	Cleaning: Apply a hazel nut sized amount of Chrom-Polish on a damp sponge and rub well on wet surface, rinse off with warm water and rub dry. Polishing: polish the cleaned surface with Chrom-Polish applied on a damp cotton cloth, rinse off and rub dry.
Advice	Please note: Check for compatibility on a small inconspicuous spot, first!
Storage	At +5° to 30°C, minimum durability 5 years
Contents	Tube 100 ml
