Adell

Why Partner With Adell?

Crafting Excellence

For over 45 years, Adell has been a leading manufacturer of premium kitchen and bathroom faucets, alongside advanced shower systems. Operating from state-of-the-art facilities, we combine engineering excellence with strict international standards to deliver trusted solutions for the global building sector.

Adell stands for innovation, sustainability, and refined aesthetics. From the initial design phase to final production, we prioritize human well-being and the environment. With masterful craftsmanship and exclusive contemporary designs, Adell continues to be the preferred choice for prestigious residential and commercial spaces.

Corporate Strength & Global Trust

We combine the industrial manufacturing excellence of Türkiye with the financial stability and corporate governance of the German Schütte Group. This partnership provides our global partners with the security of a long-term, professionally managed industrial relationship. With over 45 years of experience, we operate as a dependable extension of your own manufacturing and procurement capabilities.

Vertically Integrated & Smart Manufacturing

Adell operates as a vertically integrated industrial manufacturer, controlling every stage of the production lifecycle. From our in-house brass foundry and mold production to advanced CNC machining and robotic assembly, we maintain total control over quality and lead times. Our entire operation is governed by a fully integrated ERP system, ensuring transparency, traceability, and supply chain reliability for every order.

Uncompromising Quality Standards

We prioritize both environmental responsibility and product durability. By utilizing high-grade, UBA-listed materials and subjecting 100% of our products to rigorous laboratory testing, we ensure that every piece meets the highest international standards of performance and longevity.

Your Global Manufacturing Partner

Strategic OEM & Private-Label Partner

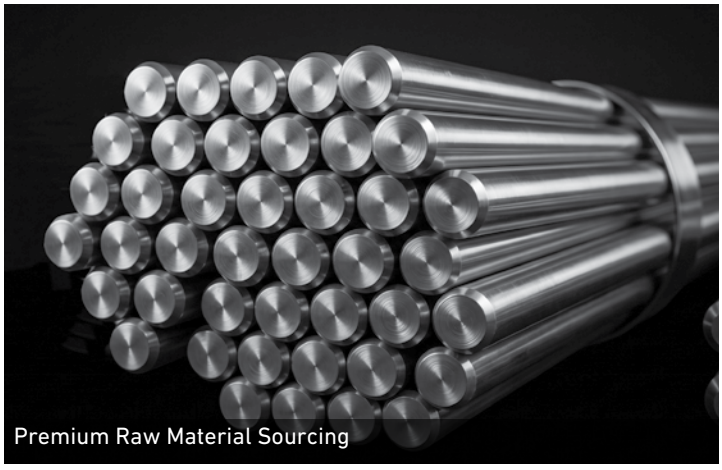

Adell serves as a comprehensive strategic partner for global brands, providing end-to-end support from initial design and R&D to mass production. Our expertise in tailoring manufacturing processes to meet your specific technical drawings and quality standards ensures that we are not just a supplier, but a reliable extension of your own brand.

Sustainable & Quality-Focused Engineering

We prioritize both environmental responsibility and product durability. Our manufacturing techniques focus on waste reduction and energy-efficient, water-saving technologies. By utilizing high-grade, UBA-listed materials and subjecting 100% of our products to rigorous quality testing, we ensure that every piece meets the highest international standards of performance and longevity.

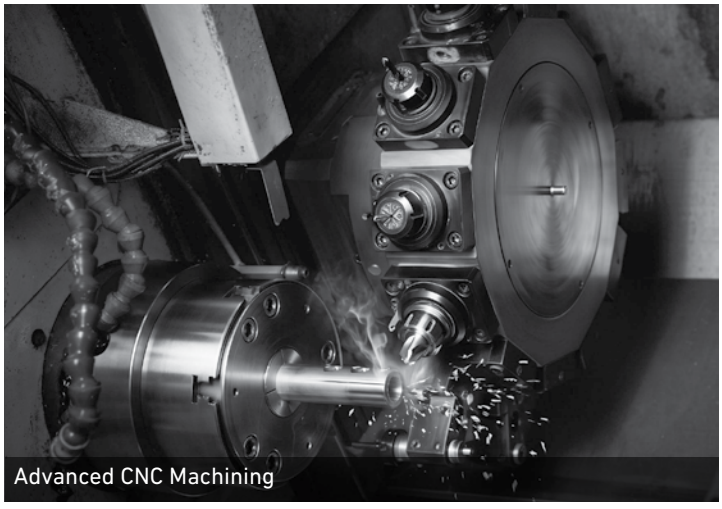

Brand Personalization & Premium Packaging

Every detail matters when presenting your brand to the market. We provide high-precision laser marking for your products and deliver retail-ready, custom-tailored packaging solutions. With meticulous attention to graphic preparation, structural design, and printing quality, we ensure your products arrive perfectly presented and protected.

Premium Raw Material Sourcing

Advanced CNC Machining

Rigorous Quality Testing

Production
& Technology at Adell

Raw Materials

High quality raw material is an unquestionable ingredient for excellent finished products.

For casting:
UBA listed CC 757 S, CC 770 S DZR, CC 771 Low-Lead

For Hot Forging:
UBA listed CW 617 N, CW 511 Low-Lead

For turning and machining:
UBA listed CW 614 N, CW 509 L, CW 510L, CW 511L, various aluminum and steel materials

Mould, Fixture and Cutting Tool Production in-House

Mould development is carried out using the most precise CNC machines. Core, casting, and hot working moulds—designed using 3D Unigraphics and SolidWorks CAD-CAM software—are manufactured in-house by machining steel or copper blocks with micron-level precision.

Low Pressure & Gravity Die Casting Over 1000 Tons Annually

Our raw castings are produced using two primary methods: low-pressure and gravity die casting. Sand cores, which are essential for internal shaping, are prepared by mixing silica sand with resins and appropriate catalysts in advanced sand preparation machines, before being precisely shaped in automated core-making equipment.

Brass Hot Forging up to 400 Tons

Utilizing advanced temperature-controlled induction furnaces, our brass billets are homogeneously heated to guarantee consistent quality and structural integrity throughout the forging process. We offer the flexibility to supply components strictly as raw forgings or as fully machined parts, tailored entirely to your technical drawings and specifications.

Machining Operations – Over 30 Workstations

Following the initial degating and deburring processes, the raw brass bodies are precision-machined in our advanced facility. Our machine park features fully automated transfer machines alongside state-of-the-art 3-, 4-, and 5-axis horizontal and vertical CNC machining centers. These systems seamlessly execute comprehensive machining operations, including complex turning, milling, and drilling.

CNC Turning up to Ø65

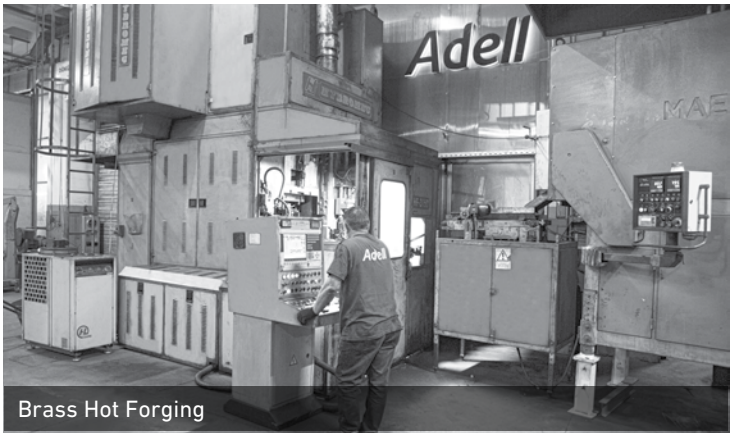

Manufacturing precision lathe-turned components strictly to customer drawings and rigorous quality specifications is the core expertise of our highly qualified engineering team. We consistently deliver tight tolerances and flawless execution for every custom project.

Steps Of Adell's Quality Process

Engineering, Design And Innovation

Innovation and design are at the core of our brand. Adell's exclusive collections blend refined aesthetics with eco-conscious engineering, specifically tailored to conserve water and protect the environment. We believe that exceptional design truly inspires.
Developed by our in-house experts, our products are driven by customer expectations and rigorous international standards. Every stage of our design process meticulously balances functionality, ergonomics, and energy efficiency with ease of installation and long-term durability. From eco-friendly packaging and waste reduction to advanced production techniques, we ensure our designs are as sustainable and practical as they are beautiful.

Adell In-house Design and Engineering Team

Behind every successful product lies a powerful idea, born from a vision turning into reality. We dedicate ourselves to creating original designs that speak the same architectural language as your environment. Each collection is meticulously developed and planned with uncompromising attention to detail. We craft designs that elevate your space and preserve every drop.

Laboratory and Testing Center

Research and development are the core elements that propel our brand into the future. Our R&D team spares no effort in developing innovative solutions designed to enhance everyday life, consistently delivering safer, smarter, and more comfortable living standards for all.

QA - Quality Management

We believe that quality is the best business plan. To uphold this standard, 100% of our finished products undergo rigorous testing to ensure flawless functionality. A comprehensive Quality Assurance system governs every level of our organization—from initial concept and prototyping through to mass production, delivery, and after-sales support. Driven by a multidisciplinary team of experts, Adell's Quality Management ensures excellence at every step of the process.

Achieving Excellence with CMM Inspection

Uncompromising quality is our highest priority. To guarantee absolute precision, our components undergo rigorous verification using state-of-the-art Coordinate Measuring Machines (CMM).
This meticulous inspection process ensures we consistently deliver reliable, high-performance products that meet the strictest tolerances.

Assembly, Testing & Packaging

True product excellence is achieved through the seamless integration of premium components and precision workmanship. Following this philosophy, every piece is meticulously selected, assembled, and rigorously tested to ensure flawless performance before being securely packaged.

Adell Design Team

Laboratory-Testing Center

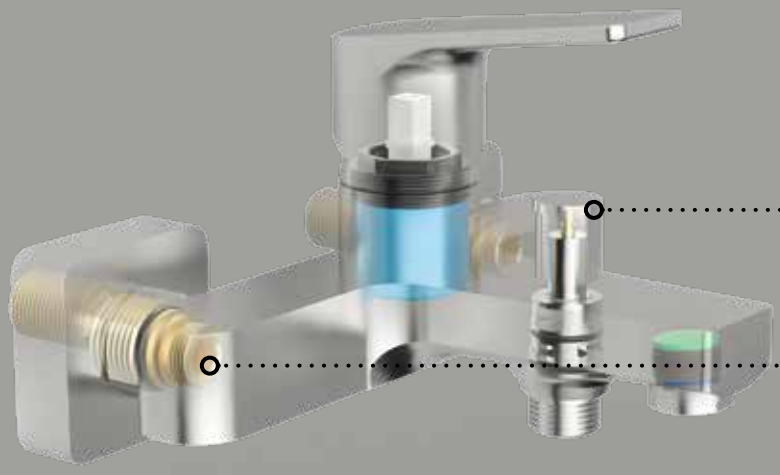

The Perfect Synergy of Materials for Sustainable Quality

What constitutes an Adell faucet? Exceptional attention to detail, premium materials, and seamlessly integrated hardware form the foundation of Adell quality. Built to the highest international standards, our faucets deliver superior, long-lasting performance. This remarkable durability is achieved through the perfect synergy and precision engineering of all internal components.

Adell Uses Only Internationally Certified High-Performance Components

The individual components manufactured for our products carry internationally recognized quality certifications. By utilizing these certified parts, we ensure maximum durability, absolute safety, and flawless performance from the inside out.

Easy-to-Operate Bath Faucet Diverters

Our bath mixers feature automatic and compact Neoperl diverters, guaranteeing long-lasting life and reliable performance. When the diverter is pulled up and locked to the right, the water flow to the hand shower remains completely unaffected by pressure fluctuations. Once the faucet is turned off, the system automatically resets to the bath spout position.

Top Quality Wall Connection Parts

Our wall-connection eccentrics and fittings are manufactured from first-quality brass. These wall connections are designed to be 10-15 mm longer than standard market products, which eliminates the need for additional thread extensions during installation.

Eco-Friendly Water-Saving Aerators

Aerators are essential components that define the true performance of our faucets. By intelligently enriching the water stream with air, they deliver a soft, voluminous, and entirely splash-free flow. This advanced air-mixing technology not only elevates your everyday comfort but also reduces water consumption by up to 50% without ever compromising on performance.

Tested for Over 1,000,000 Cycles

The cartridge is the heart and the most important working component of a faucet. Adell products are equipped with high-quality, long-lasting cartridges featuring world-class ceramic discs. They are available in 35 mm and 40 mm sizes, with or without base feet. We also utilize specialized cartridges in select series. All our cartridges ensure absolute watertightness, heat resistance, and abrasion resistance for a long-lasting lifespan.

Certified Flexible Hoses

Our basin and kitchen faucets are equipped with 100% tested, leak-proof stainless steel or PE-braided PEX flexible hoses. They are highly durable and completely safe for drinking water.

Omnichannel Solutions That Grow Your Business

Accessing Adell's exceptionally designed and engineered water solutions has never been easier. We combine the power of our B2B portal, exclusively developed for our business partners, with the seamless accessibility of leading marketplaces for our individual users. Whether you manage your wholesale orders in seconds via our dealer portal or choose adell.com and our official stores on trusted e-commerce platforms for your retail purchases, in this expansive, time-saving ecosystem, simply focus on growing your business and beautifying your living spaces—leave the rest to our digital infrastructure.

Special Offers for Professional Partners

Unlock exclusive advantages designed specifically for our B2B network. Through our dedicated partner portal, professionals gain access to tailored campaigns, volume-based discounts, and highly competitive pricing structures. We are committed to fueling your growth by providing premium commercial benefits and unwavering corporate assurance at every stage.

Smart Management and Total Control

Empower your business with data. Thanks to our Smart Business Intelligence solutions, seamlessly integrated with the world's leading software infrastructures, you can transparently monitor your account activities and instantly track operational productivity. Our holistic ecosystem provides our B2B partners with absolute control and agility at every step.

Transparent Processes, Fast Delivery

We are by your side from order placement to final shipment. By automating operational workflows with our advanced IT solutions, we maximize efficiency. Regardless of the channel you use to place your order, you will experience a transparent, streamlined, and rapid logistics journey—from order approval to doorstep delivery.

For comprehensive technical specifications, installation guides, and warranty documents, please visit our official website at **www.adell.com** at any time.

Product Features

Gentle on Surfaces
The soft textile exterior protects your bathtubs, glass cabins, and ceramics from scratches.

Tangle-Free Flexibility
Highly flexible structure prevents knots and ensures maximum freedom of movement during your shower.

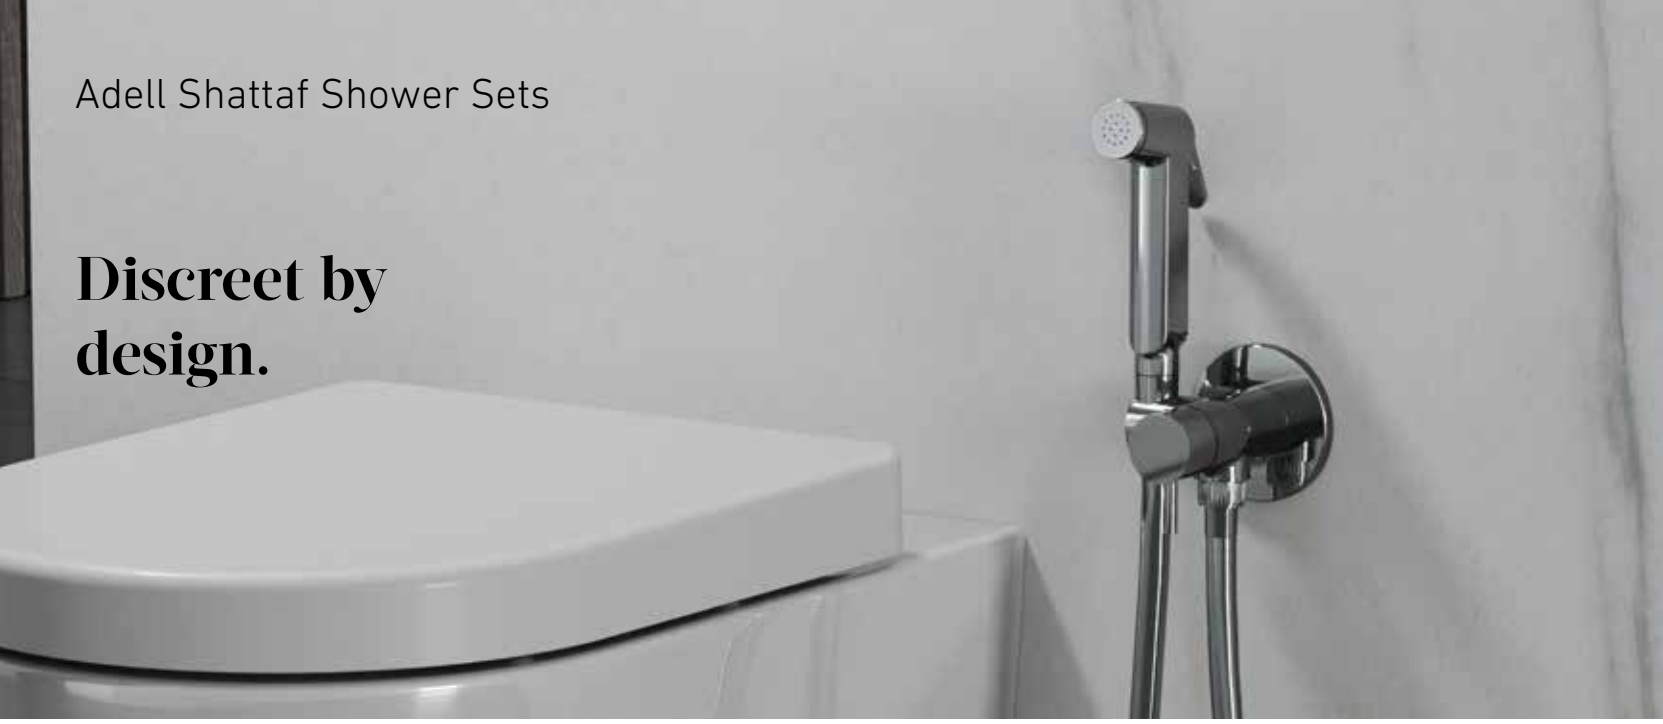

Water-Repellent & Hygienic
Specially woven fabric resists water absorption, ensuring quick drying and easy cleaning.

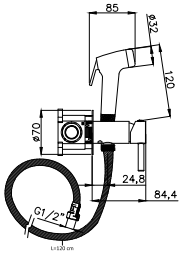

Soft Touch Comfort
Provides a warm, skin-friendly texture, offering a premium feel unlike traditional cold metal hoses.

Tap-Cleaner

Tap Cleaner Spray For Metal Parts
In the bathroom you want everything to shine, but the common sanitary cleaners often affect taps and fittings. Indeed, the taps are thoroughly clean afterwards, but there is always a risk of having damaged the gasket and components (e.g. valves and cartridges). Often aggressive cleaners are the reason for complaints. Therefore we recommend our Tap-Cleaner for the correct cleaning and care. Limescale and deposits will be removed gently without harming the surrounding ceramic and enamel surfaces. Thus preserving the value of the sanitary objects for a long time.

Spray bottle 750 ml
18330005

Product Features

Description:
Tap-Cleaner

Application:
For daily cleaning and care of taps and whirl pool jets

Surfaces:
Chrome, stainless steel, brass, gold glossy/matte chrome, satined and gold plated surfaces

Customer's Benefit:
Backed by TÜV-certified quality, this enamel-safe, eco-friendly, and biodegradable formulation ensures brilliant metal surfaces and protects internal valves, while providing a lasting dirt-repellent finish through advanced beading and anti-static effects.

How To Use:
Spray cleaner onto the tap, allow to work briefly and then rinse with warm water and rub dry

Advice:
Do not use on limestone surfaces (marble).

Storage:
At +5° to 30°C, minimum durability 10 years

Chrome-Polish

Brilliance in Every Detail.
Commercial detergents for fittings contain potent acids to effectively remove limescale. In doing so the fittings get cleaned, yet, there is a risk of also affecting the surrounding enamel surfaces of the bathtub or the shower tray in an unfavourable way. Cramer Chrome-Polish removes heavy stains and traces of oxidation leaving shiny fittings. With its enamel-friendly formulation it is also non-hazardous to the surrounding surfaces in the bathroom and leaves them sparkling as well.

Tube 100 ml
18330004

Product Features

Description:
Chrome-Polish

Application:
Chrome polish for heavily stained and corroded surfaces

Surfaces:
Glossy and matt chrome surfaces

Customer's Benefit:
Thoroughly but gently cleans the surface, Acid-free and enamel-friendly formulation, Concentrated cleaning compound, Gentle on the skin, pleasant scent

How To Use:
Cleaning: Apply a hazel nut sized amount of Chrome-Polish on a damp sponge and rub well on wet surface, rinse off with warm water and rub dry. Polishing: polish the cleaned sur face with Chrome-Polish applied on a damp cotton cloth, rinse off and rub dry.

Advice:
Please note: Check for compatibility on a small inconspicuous spot, first!

Storage:
At +5° to 30°C, minimum durability 5 years
